| | |
|-----------------------|---|
| Date of Notification: | 09 June 2003 |
| Date Action Started: | 09 June 2003 |
| Pollutant: | Soil Contamination from Meth Lab activities |
| Quantity Discharged: | Unknown at this time |
| RP Identification: | Unknown at this time |

III ACTIONS TAKEN

On June 09, 2003 telephone duty received a call from OSC Spurlin concerning possible contaminated soil from a meth lab operation discovered by the sheriff department and other responders of White County, TN. The State and County have requested assistance from EPA to respond to stressed vegetation and possible soil contamination. The National Response Center Report number is 647404.

On June 10, OSC Spurlin and EPA's START contractor met the White County EMA Director and local Sheriff on-scene. Two soil samples were collected from areas suspected to have been impacted by meth lab operations. Both areas were small in size with one area displaying stressed vegetation, and the other area reported to have an unusual odor.

IV FUTURE ACTIONS

START will produce a final site report summarizing site activities..

V

ESTIMATED COSTS

Unknown at this time.
